Editing the answer key after exam performance

Question type	Beforehand	Editable
Multiple-choice question	1 correct answer possible 1 point	Yes, it is possible to edit the answer key and alter the correct answer, or even to change a multiple-choice question into a multiple-response question. *Please note!* Do you want to label an answer as a distractor after exam performance? Assign a point to the distractor in the answer key, but don't label it as the correct answer. After exam performance, it is possible to: • Edit the answer key • Remove a question from the exam • Assign full points to all students regardless of their answer
Multiple-response question	2 correct answers can be ticked	Yes, it is possible to edit the answer key and alter the correct answers. In addition, it is possible to re-label 'correct answer' to 'score distribution', 'product rule', and 'quotient rule'. The number of points per question can also be edited. After exam performance, it is possible to: • Edit the answer key • Remove a question from the exam • Assign full points to all students regardless of their answer
Hotspot question	Circle 1 correct answer possible 1 point	No, it is not possible to edit the answer key after exam performance. After exam performance, it is possible to: • Remove a question from the exam • Assign full points to all students regardless of their answer
Graphic associate question	Possible distribution of scores: - (minus)points for association outside the appointed areas (-1 point) - Bonus points (1 point) - Total score (4 points) - Three correct associations (1 point per association) - 1 wrong association (-1 point)	No, it is not possible to edit the answer key after exam performance. After exam performance, it is possible to: • Remove a question from the exam • Assign full points to all students regardless of their answer
Text entry question	1 point 1 answer option can be entered into the text	Yes, it is possible to edit the answer key after exam performance. You can even add multiple extra answers, which can be labelled as 'correct' or 'partly correct'. After exam performance, it is possible to: • Edit the answer key • Remove a question from the exam • Assign full points to all students regardless of their answer

Order question	1 correct answer possible 1 point	Yes, it is possible to edit the answer key after exam performance. You are only able to edit the order. It is not possible to label two different orders as 'correct'. In addition, it is possible to re-label 'correct answer' to 'quotient rule', and to edit the number of points.
Drag and drop question	'Maximum number of times this image can be used' = 1 1 image placed in the hotspot area counts for 1 point.	No, it is not possible to edit the answer key after exam performance. After exam performance, it is possible to: • Remove a question from the exam • Assign full points to all students regardless of their answer
Matching question	Multiple associations per row can be deemed as correct 1 point	Yes, it is possible to edit the answer key after exam performance. You can label one or multiple answers as 'correct'. In addition, it is possible to re-label 'correct answer' to 'score distribution', to ensure that a part of the points can be given. The number of points can also be edited. After exam performance, it is possible to: • Edit the answer key • Remove a question from the exam • Assign full points to all students regardless of their answer
Open question	2 assessment criteria 2 points	Yes, it is possible to edit the answer key after exam performance. After exam performance, it is possible to: • Edit the assessment criteria and the number of points • Remove a question from the exam • Assign full points to all students regardless of their answer
Combined question		It is only possible to edit the answer key after exam performance if the combined question is made up of editable question types. If one of the question types disallows editing, the entire combined question cannot be edited. **Please note:** the following actions can be applied to any sub question within the combined question: • Remove a question from the exam • Assign full points to all students regardless of their answer

Conclusion

It is possible to edit the answer key after exam performance for the following question types: multiple-choice question, multiple-response question, text-entry question, order question, open question, and matching question.

It is not possible to edit the answer key after exam performance for the following question types: hotspot question, graphic associate question, and drag and drop question. These question types only allow for the removal of an entire question, or the assigning of full points to all students regardless of their answer.

The combined question is the odd one out here, as it is not possible to remove a sub question from the exam, nor to assign full points to all students regardless of their answer.
